

USB Tethering – Samsung X-Cover 4s

You can use the internet connection from your phone by directly connecting your device to your laptop via the USB cable – this is called USB Tethering.

When you connect your phone to your laptop for the first time, device drivers will be installed, this can take 1 minute to complete.

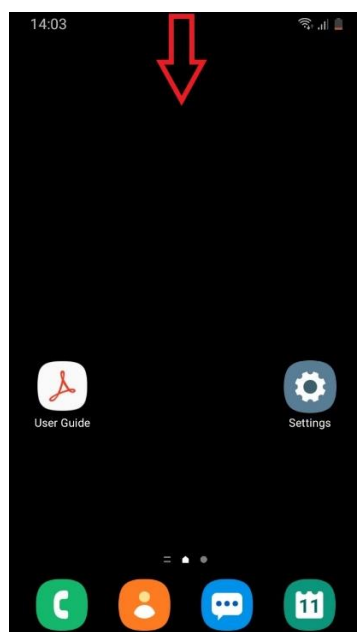

Step 1

Connect phone to your laptop via USB cable, press “Allow”

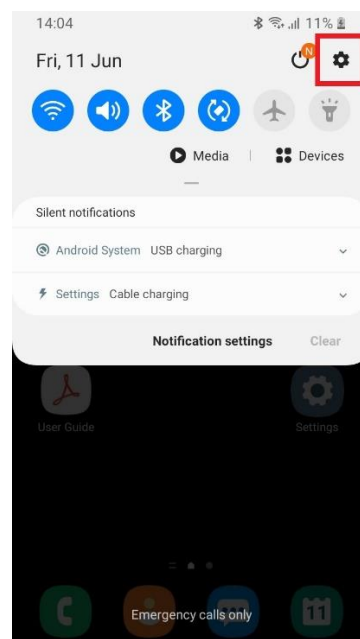

Step 2

Pull down from the top of the screen to view quick settings

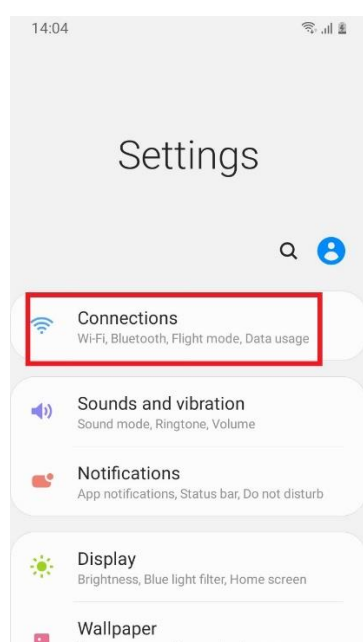

Step 3

Press on to the settings button highlighted below

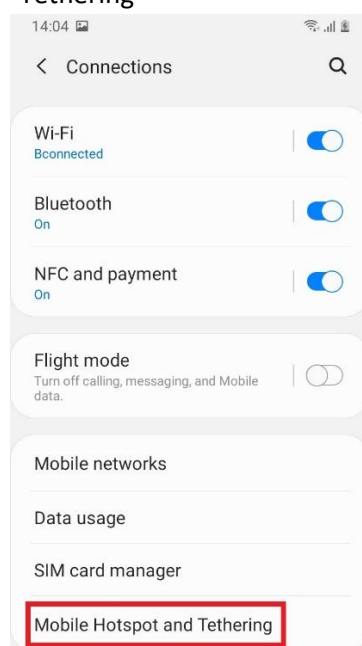

Step 4

Select “Connections”

Step 5

Press “Mobile Hotspot and Tethering”

Step 6

Enable USB tethering by pressing the highlighted button below
